

How to Unselect & Select Layers on Pocket 3D V15

1. Tap **"Data"** at the bottom menu then tap **"Layers"**.

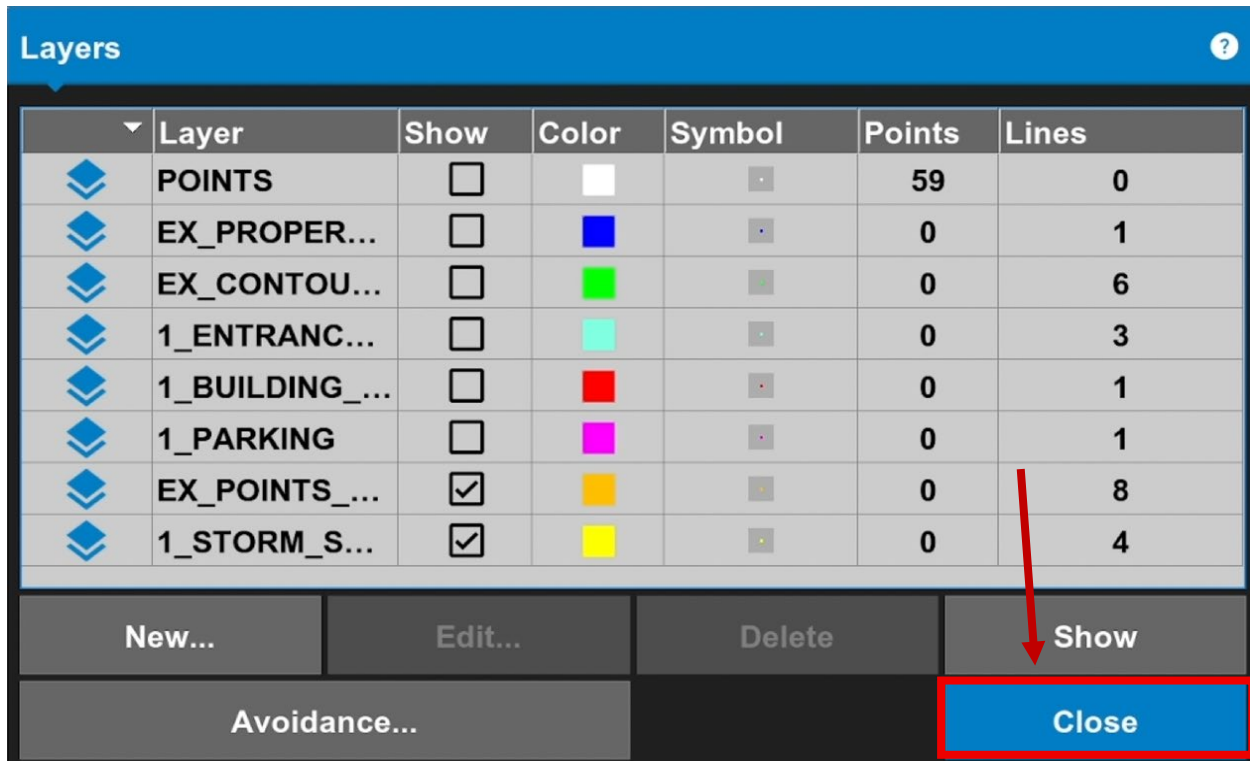

2. You can “Unselect” layers at the “Show” Column.

Layers						
	Layer	Show	Color	Symbol	Points	Lines
	POINTS	☐			59	0
	EX_PROPER...	☐			0	1
	EX_CONTOU...	☐			0	6
	1_ENTRANC...	☐			0	3
	1_BUILDING_...	☒			0	1
	1_PARKING	☒			0	1
	EX_POINTS_...	☒			0	8
	1_STORM_S...	☒			0	4
New...		Edit...	Delete	Show		
Avoidance...					Close	

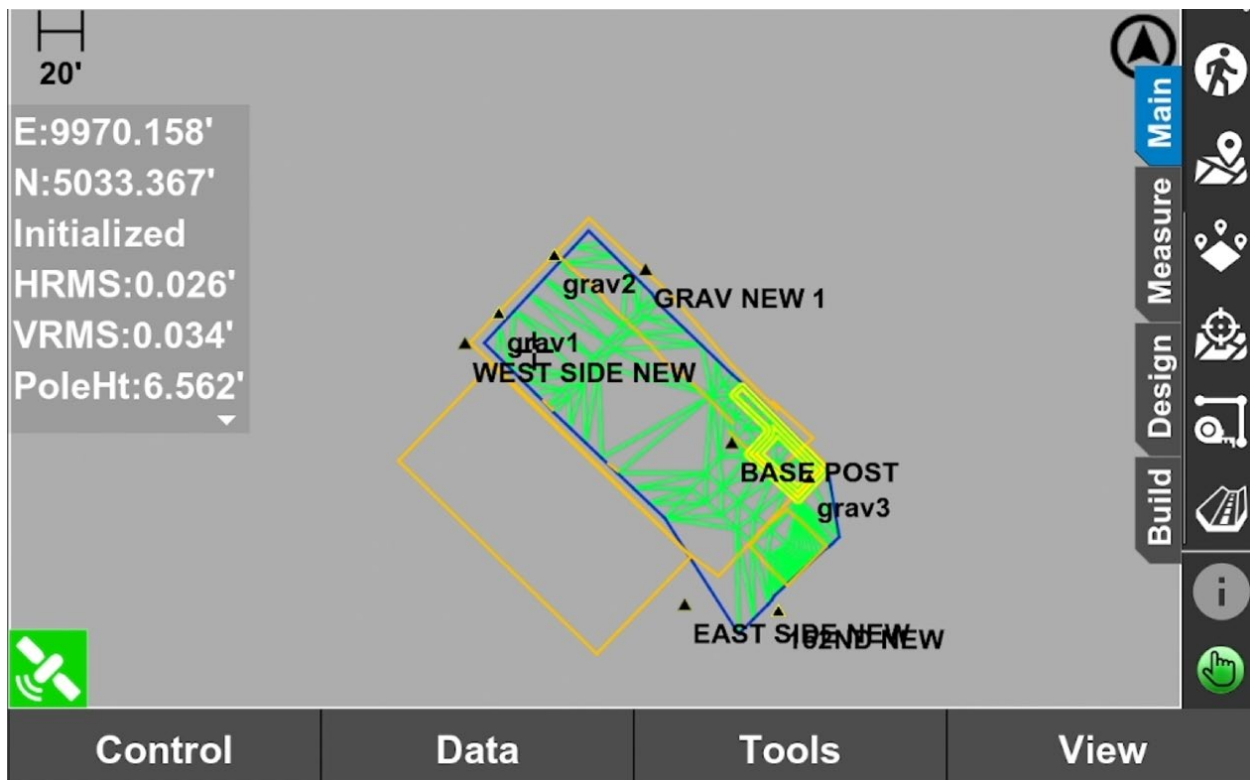

3. You can also change the color of your layers at the “Color” Column.

Layers						
	Layer	Show	Color	Symbol	Points	Lines
	POINTS	☐			59	0
	EX_PROPER...	☐			0	1
	EX_CONTOU...	☐			0	6
	1_ENTRANC...	☐			0	3
	1_BUILDING_...	☒			0	1
	1_PARKING	☒			0	1
	EX_POINTS_...	☒			0	8
	1_STORM_S...	☒			0	4
New...		Edit...	Delete	Show		
Avoidance...					Close	

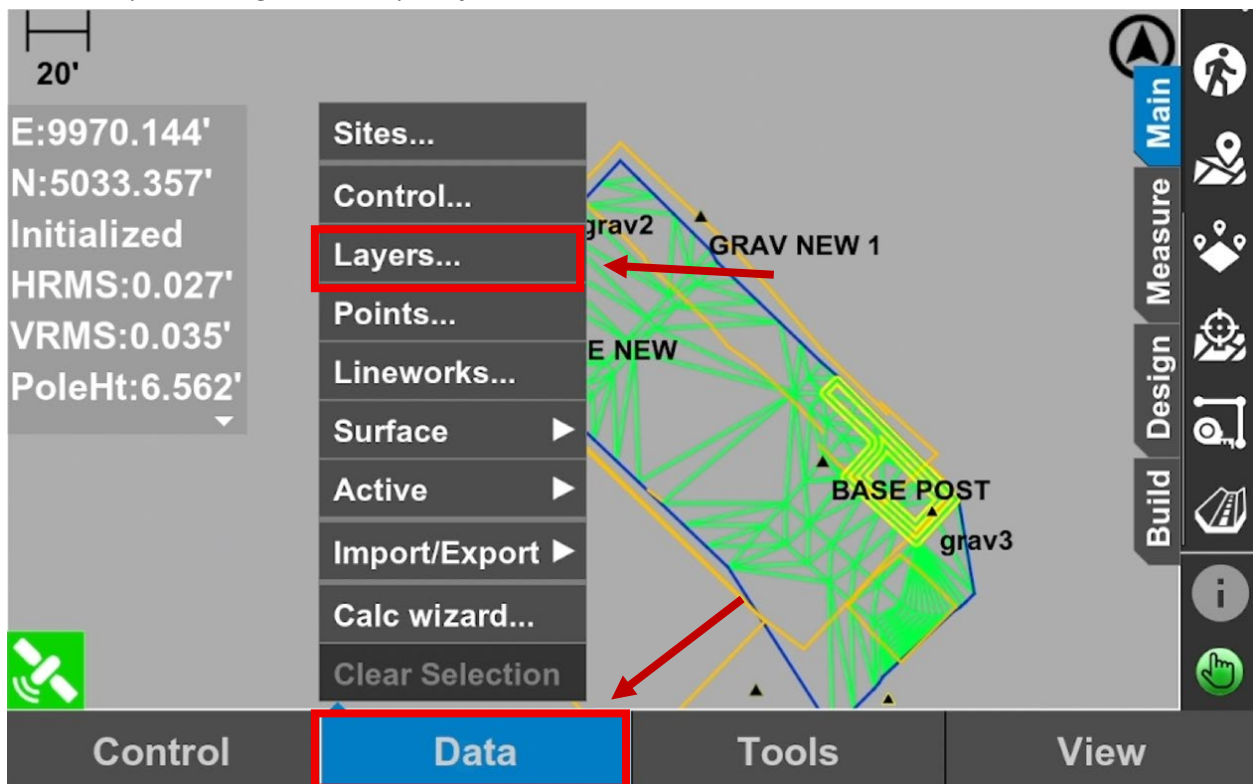

4. After unselecting, tap “Close”.

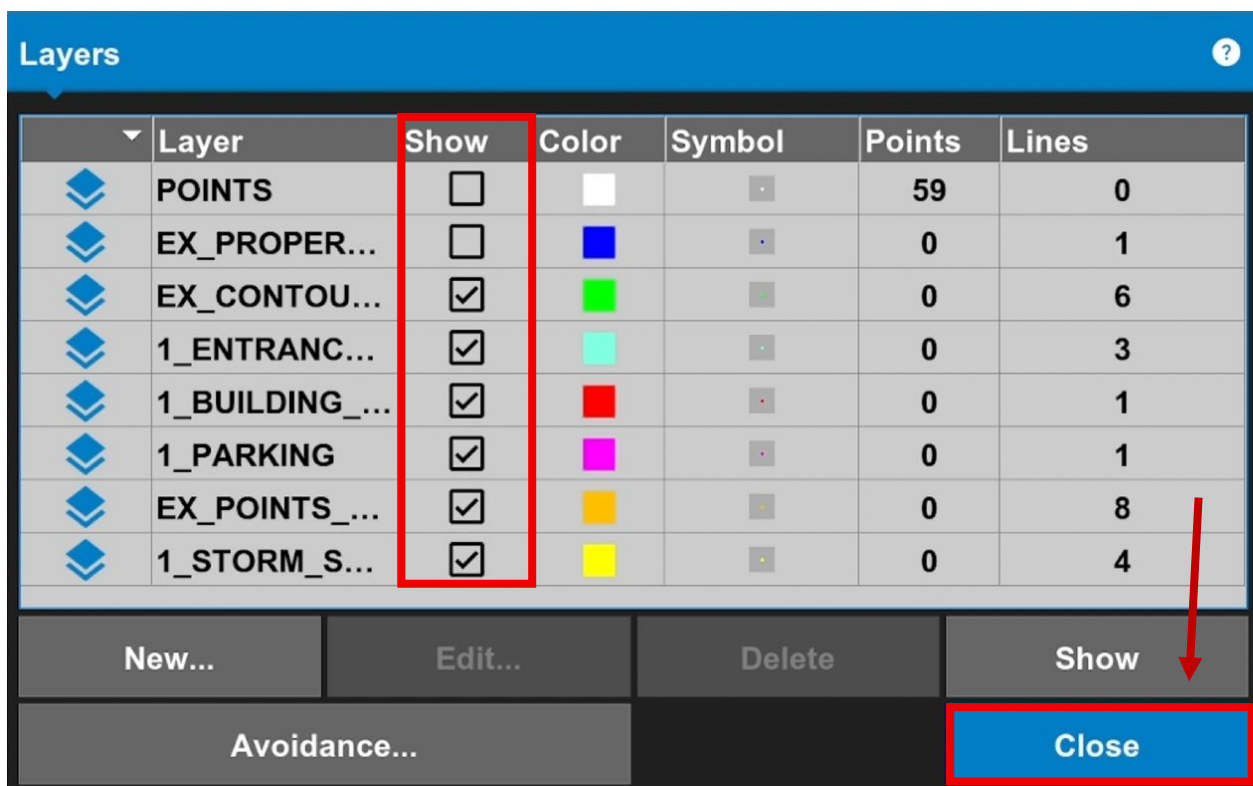

5. Then, you'll see a lot of your “Line Work” is now out.

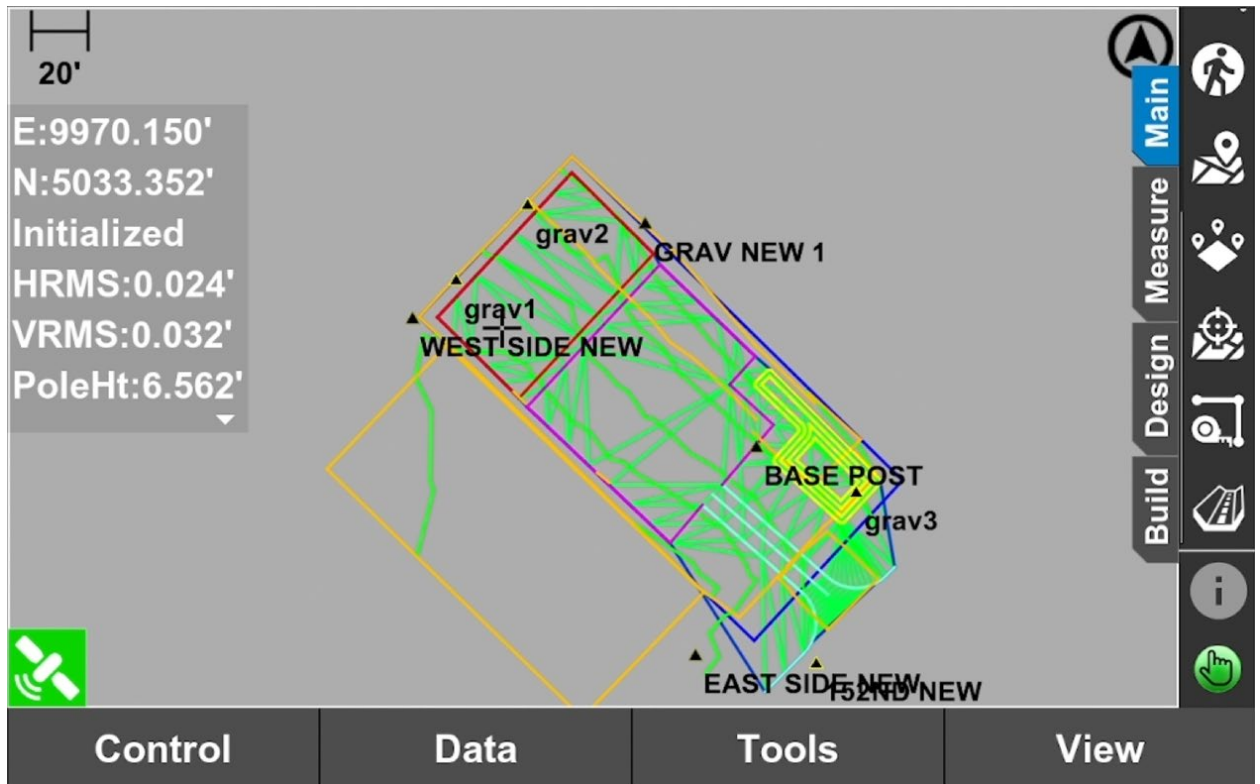

6. Tap "Data" again then tap "Layers".

7. Select the layers then click "Close".

8. Then you'll see a lot more layers popped up.
